

CLIMATE CHANGE

WEBINAR SERIES 2020

Engagement of the youth in climate action is a key factor in mitigating the global issue with local solutions.

With this imperative, TROP ICSU has joined hands with the Centre for Cellular and Molecular Biology (CCMB), India to create a platform to host engagements between climate change experts (scientists, activists, social entrepreneurs among many) with young students.

A webinar series has been launched under this initiative of Climate Change Challenge 2.0 from August 2020.
