

# TROP ICSU FEATURED

# BY UN CC:LEARN

TROP ICSU is now listed on the UN CC:Learn knowledge-sharing platform (The One UN Climate Change Learning Partnership) in different categories.

Learning Resources – [Learning Platforms](#)

Themes – [Education](#)

Learning Resources – [Library](#)

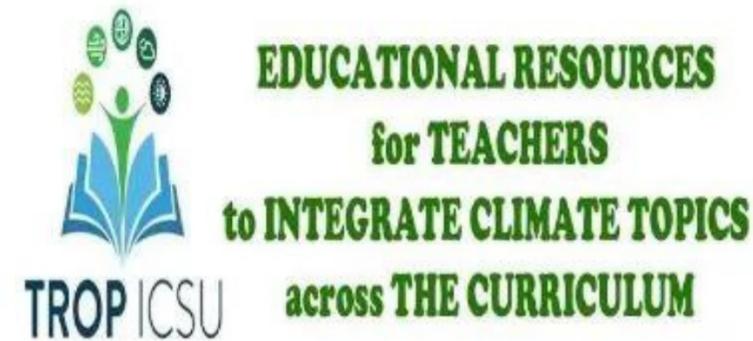

All the links above are available in English, French and Spanish.

## Education

By raising awareness and promoting knowledge and skills development, education is an essential component and a catalyst for responding to global climate change. Its importance has been increasingly highlighted at the international level.

The UN CC:Learn partners work together to facilitate the integration of climate change in the formal and informal education systems, notably by supporting the inclusion of the subject in the curricula, facilitating the training of teachers, or contributing to the development of pedagogical materials.

### TROP ICSU: Educational Resources for Teachers to Integrate Climate Topics Across the Curriculum

This is a repository of teaching resources that can be used by educators to teach a topic in a discipline by using case studies and activities related to climate change.

### Video: Climate Change INAFOCAM 2016

This shows the progress of the training program for Dominican teachers on climate change, conducted by the National Institute of Education and Training of Teachers (INAFOCAM) in 2016.
