Lesson Plan: Climate Change Impacts in Georgia

As a **High School** or introductory **Undergraduate** teacher, you can use this lesson plan to **introduce climate change and its impacts in Georgia**.

This lesson plan provides an introduction to climate change, causes and impacts of climate change globally, climate change risk profile for Georgia that includes climate impacts on major sectors of the country such as agriculture, water resources, human health, energy, tourism and ecosystems.

Thus, the use of this lesson plan allows you to teach Climate Science and Climate Change in your classrooms.

Use this Lesson Plan to help the students to understand and find answers to:

- 1. What is Climate Change? What are its causes?
- 2. What are the impacts of climate change on Georgia?
- 3. What are the impacts of climate change on agriculture, water resources & energy, human health, energy, tourism and ecosystems in Georgia?
- 4. What mitigation practices can be adopted to control the impacts of climate change in Georgia?

About the Lesson Plan

Grade Level	High School, Undergraduate
Climate Topic	Climate Change Impacts in Your Country
Location	Europe and Central Asia, Georgia
Access	Online
Language(s)	English
Approximate Time Required	60 mins

Contents

1.	Reading (15	A reading from the NASA Global Climate Change website that includes	
	min) and Video	information about what is the scientific evidence for climate change, causes, and	
	(5-15 min)	impacts of climate change. This can be accessed <u>here</u> .	
		Optional : A set of 7 short video micro-lectures (2-5 minutes in length) on	
		climate change and global warming developed by the National Research	
		Council, The National Academies of Sciences, Engineering, and Medicine. This	
		can be accessed <u>here</u>	
2.	Reading 1	A reading by Climate Change Knowledge Portal of the World Bank that explains	
-	(World Bank)	climate change and impacts in Georgia.	
	(World Bulk)	chimate change and impacts in Goorgia.	
		This can be accessed here.	
_	Dan din a o		
3	Reading 2	This reading is the Climate Change Risk Profile fact sheet for Georgia by	
	(USAID)	Climatelinks: A Global Knowledge Portal for Climate and Development	
		Practitioners USAID.	
		This can be accessed here.	
4	Classroom/Lab	A classroom/laboratory activity based on a reading and video on Georgia. This	
	oratory Activity		
	(15 min)	also states the possible solutions to counter the crisis.	
		The reading can be accessed here.	
		The video can be accessed here.	

Step-by-step User Guide

(Here is a step-by-step guide to using this lesson plan in the classroom/laboratory. We have suggested these steps as a possible plan of action. You may customize the lesson plan according to your preferences and requirements.)

1	Introduce Climate Change through the readings and videos	This reading titled, "The Causes of Climate Change" from the NASA Global Climate Change website, provides introductory information on climate change and global warming. It contains information on the scientific evidence of climate change, its causes and impacts.	
		This can be accessed <u>here</u> .	
		Optional: This set of 7 short video micro-lectures (2-5 minutes in length) have been developed by the National Research Council, The National Academies of Sciences, Engineering, and Medicine. This can be used to provide additional information on climate change.	
		They include: 1. What is Climate? Climate Change, Lines of Evidence Chapter 1 2. Is Earth Warming? Climate Change, Lines of Evidence Chapter 2 3. Greenhouse Gasses. Climate Change, Lines of Evidence Chapter 3 4. Increased Emissions. Climate Change, Lines of Evidence Chapter 4 5. How Much Warming? Climate Change, Lines of Evidence Chapter 5 6. Solar Influence. Climate Change, Lines of Evidence Chapter 6 7. Natural Cycles. Climate Change, Lines of Evidence Chapter 7	
		This video playlist can be accessed <u>here</u> .	

2	Discuss causes and	Use this interactive website by the Climate Change Knowledge Portal of the	
	impacts of Climate	World Bank to have your students understand the impacts of Climate	
	Change in Georgia	Change in Georgia. This resource includes the following:	
		I. Climate Change Overview of Georgia II. Country Summary	
		III. Current Climatology: Climate Trends and Variability in	
		Temperatures and Precipitation	
		IV. Climate Projections	
		V. Vulnerability of Georgia to Climate Change	
		Each section contains relevant climate change information including data,	
		projections, and visualizations. The data is visualized through interactive	
		graphs and users can select different indices, model projections,	
		timescales, and sectors to better understand the impacts of climate change	
		in Georgia. This can be accessed <u>here</u> .	
	Further understanding	You may wish to have your students explore climate change and its risks in Georgia in more detail through a resource from climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the USAID.	
3	Further understanding on impacts of Climate Change on key sectors in Georgia	Georgia in more detail through a resource from climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the	
3	on impacts of Climate Change on key sectors	Georgia in more detail through a resource from climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the	
3	on impacts of Climate Change on key sectors	Georgia in more detail through a resource from climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the USAID. This factsheet on climate risks in Georgia includes information on: I. Current and future climate impacts and vulnerabilities II. Climate impacts on key sectors of: 1) Agriculture	
3	on impacts of Climate Change on key sectors	Georgia in more detail through a resource from climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the USAID. This factsheet on climate risks in Georgia includes information on: I. Current and future climate impacts and vulnerabilities II. Climate impacts on key sectors of: 1) Agriculture 2) Water Resources	
3	on impacts of Climate Change on key sectors	Georgia in more detail through a resource from climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the USAID. This factsheet on climate risks in Georgia includes information on: I. Current and future climate impacts and vulnerabilities II. Climate impacts on key sectors of: 1) Agriculture	
3	on impacts of Climate Change on key sectors	Georgia in more detail through a resource from climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the USAID. This factsheet on climate risks in Georgia includes information on: I. Current and future climate impacts and vulnerabilities II. Climate impacts on key sectors of: 1) Agriculture 2) Water Resources 3) Human Health 4) Energy 5) Tourism	
3	on impacts of Climate Change on key sectors	Georgia in more detail through a resource from climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the USAID. This factsheet on climate risks in Georgia includes information on: I. Current and future climate impacts and vulnerabilities II. Climate impacts on key sectors of: 1) Agriculture 2) Water Resources 3) Human Health 4) Energy

Learning Outcomes:

The tools in this lesson plan will enable students to:

- learn about climate change and global warming
- understand the impacts of climate change in Georgia
- discuss how changing weather patterns due to climate change could affect future of Georgia
- describe the current and future health risks and economic impacts on Georgia due to climate change

Additional Resources

1.	Reading	Climate Risk Country Profile for Georgia: This reading by Climate Change Knowledge Portal of World Bank explains in detail the Climatology, Climate related Natural Hazards & Impacts and Policies and Programs in Georgia.
2.	Reading	Georgia Greenhouse Gas Emissions Fact Sheet: This fact sheet by Climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the USAID, gives information about change in GHG Emissions in Guatemala (1990-2011), GHG Emissions Relative to GDP and Mitigation Targets.
3	Reading	Intended Nationally Determined Contribution, Georgia: This report provided by UNFCCC is a submission of commitment towards mitigating Climate Change by Georgia.
