

## Lesson Plan: Climate Change Impacts in Luxembourg

As a **High School** or introductory **Undergraduate** teacher, you can use this lesson plan to **introduce climate change and its impacts in Luxembourg**.

This lesson plan provides an introduction to climate change, causes and impacts of climate change globally, climate change risk profile for Luxembourg that includes climate impacts on major sectors of the country such as agriculture, water resources, human health, industries and tourism.

Thus, the use of this lesson plan allows you to teach Climate Science and Climate Change in your classrooms.

Use this Lesson Plan to help the students to understand and find answers to:

1. What is Climate Change? What are its causes?
2. What are the impacts of climate change on Luxembourg?
3. What are the impacts of climate change on agriculture, water resources, human health, industries and tourism in Luxembourg?
4. What mitigation practices can be adopted to control the impacts of climate change in Luxembourg?

### About the Lesson Plan

Grade Level	High School, Undergraduate
Climate Topic	Climate Change Impacts in Your Country
Location	Europe, Luxembourg
Access	Online
Language(s)	English
Approximate Time Required	60 mins

### Contents

1.	<b>Reading</b> (15 min) and <b>Video</b> (5-15 min)	A reading from the NASA Global Climate Change website that includes information about what is the scientific evidence for climate change, causes, and impacts of climate change. This can be accessed <a href="#">here</a> .  <b>Optional:</b> A set of 7 short video micro-lectures (2-5 minutes in length) on climate change and global warming developed by the National Research Council, The National Academies of Sciences, Engineering, and Medicine. This can be accessed <a href="#">here</a> .
2	<b>Reading 1 (World Bank)</b>	A reading by the Climate Change Knowledge Portal of the World Bank that explains climate change and impacts in Luxembourg.  This can be accessed <a href="#">here</a> .
5	<b>Classroom/Laboratory Activity</b> (15 min)	A classroom/laboratory activity based on a reading and video on Luxembourg. This reading and video explains the causes and impacts of Luxembourg on Luxembourg and also states the possible solutions to counter the crisis.  The reading can be accessed <a href="#">here</a> .

### Step-by-step User Guide

(Here is a step-by-step guide to using this lesson plan in the classroom/laboratory. We have suggested these steps as a possible plan of action. You may customize the lesson plan according to your preferences and requirements.)

1	Introduce Climate Change through the readings and videos	This reading titled, “The Causes of Climate Change” from the NASA Global Climate Change website, provides introductory information on climate change and global warming. It contains information on the scientific evidence of climate change, its causes and impacts.  This can be accessed <a href="#">here</a> .  Optional: This set of 7 short video micro-lectures (2-5 minutes in length) have been developed by the National Research Council, The National Academies of Sciences, Engineering, and Medicine. This can be used to provide additional information on climate change.  They include: <ol style="list-style-type: none"> <li>1. What is Climate? Climate Change, Lines of Evidence Chapter 1</li> <li>2. Is Earth Warming? Climate Change, Lines of Evidence Chapter 2</li> <li>3. Greenhouse Gasses. Climate Change, Lines of Evidence Chapter 3</li> <li>4. Increased Emissions. Climate Change, Lines of Evidence Chapter 4</li> <li>5. How Much Warming? Climate Change, Lines of Evidence Chapter 5</li> <li>6. Solar Influence. Climate Change, Lines of Evidence Chapter 6</li> <li>7. Natural Cycles. Climate Change, Lines of Evidence Chapter 7</li> </ol> This video playlist can be accessed <a href="#">here</a> .
---	--	--

2	Discuss causes and impacts of Climate Change in Luxembourg	<p>Use this interactive website by the Climate Change Knowledge Portal of the World Bank to have your students understand the impacts of Climate Change in Luxembourg. This resource includes the following:</p> <ol style="list-style-type: none"> <li>I. Climate Change Overview of Luxembourg</li> <li>II. Country Summary</li> <li>III. Current Climatology: Climate Trends and Variability in Temperatures and Precipitation</li> <li>IV. Climate Projections</li> <li>V. Vulnerability of Luxembourg to Climate Change</li> </ol> <p>Each section contains relevant climate change information including data, projections, and visualizations. The data is visualized through interactive graphs and users can select different indices, model projections, timescales, and sectors to better understand the impacts of climate change in Luxembourg.</p> <p>This can be accessed <a href="#">here</a>.</p>
4	OPTIONAL Classroom/Laboratory Activity on the 'Lake Chad Crisis'	You may wish to conduct a {roleplay} activity in your classroom/laboratory to further engage your students in understanding the climate crisis in Luxembourg; specifically on the impact of climate change on food security and water security in Luxembourg.

**Learning Outcomes:**

The tools in this lesson plan will enable students to:

- learn about climate change and global warming
- understand the impacts of climate change in Luxembourg
- discuss how changing weather patterns due to climate change could affect Luxembourg's future
- describe the current and future health risks and economic impacts on Luxembourg due to climate change

**Additional Resources**
