Lesson Plan: Climate Change Impacts in Niger

As a **High School** or introductory **Undergraduate** teacher, you can use this lesson plan to **introduce climate change and its impacts in Niger**.

This lesson plan provides an introduction to climate change, causes and impacts of climate change globally, climate change risk profile for Niger that includes climate impacts on major sectors of the country such as agriculture, livestock, water resources, human health, ecosystems and fisheries.

Thus, the use of this lesson plan allows you to teach Climate Science and Climate Change in your classrooms.

Use this Lesson Plan to help the students to understand and find answers to:

- 1. What is Climate Change? What are its causes?
- 2. What are the impacts of climate change on Niger?
- 3. What are the impacts of climate change on agriculture, livestock water resources, human health, ecosystems and fisheries in Niger?
- 4. What mitigation practices can be adopted to control the impacts of climate change in Niger?

About the Lesson Plan

Grade Level	High School, Undergraduate
Climate Topic	Climate Change Impacts in Your Country
Location	Africa, Niger
Access	Online
Language(s)	English
Approximate Time Required	60 mins

Contents

	Reading (15	A reading from the NASA Global Climate Change website that includes	
	min) and Video information about what is the scientific evidence for climate change, or		
	(5-15 min)	impacts of climate change. This can be accessed <u>here</u> .	
Optional : A set of 7 short video micro-lectures (2-5 minutes i			
		climate change and global warming developed by the National Research	
		Council, The National Academies of Sciences, Engineering, and Medicine. This	
		can be accessed here	
	Reading 1	A reading by Climate Change Knowledge Portal of the World Bank that explains	
	(World Bank)	climate change and impacts in Niger.	
		This can be accessed <u>here</u> .	
3	Reading 2	This reading is the Climate Change Risk Profile fact sheet for West Africa Sahel	
	(USAID)	by Climatelinks: A Global Knowledge Portal for Climate and Development	
		Practitioners USAID.	
		This can be accessed <u>here</u> .	
	Classroom/Lab	A classroom/laboratory activity based on a reading and video on Niger. This	
	oratory Activity		
	(15 min)	states the possible solutions to counter the crisis.	
		The reading can be accessed here.	
		The video can be accessed here.	

Step-by-step User Guide

(Here is a step-by-step guide to using this lesson plan in the classroom/laboratory. We have suggested these steps as a possible plan of action. You may customize the lesson plan according to your preferences and requirements.)

1	Introduce Climate Change through the readings and videos	This reading titled, "The Causes of Climate Change" from the NASA Global Climate Change website, provides introductory information on climate change and global warming. It contains information on the scientific evidence of climate change, its causes and impacts.	
		This can be accessed <u>here</u> .	
		Optional: This set of 7 short video micro-lectures (2-5 minutes in length) have been developed by the National Research Council, The National Academies of Sciences, Engineering, and Medicine. This can be used to provide additional information on climate change.	
		They include:	
		 What is Climate? Climate Change, Lines of Evidence Chapter 1 Is Earth Warming? Climate Change, Lines of Evidence Chapter 2 	
		3. Greenhouse Gasses. Climate Change, Lines of Evidence Chapter 3 4. Increased Emissions. Climate Change, Lines of Evidence Chapter 4	
		5. How Much Warming? Climate Change, Lines of Evidence Chapter	
		5 6. Solar Influence. Climate Change, Lines of Evidence Chapter 6	
		7. Natural Cycles. Climate Change, Lines of Evidence Chapter 7	
		This video playlist can be accessed <u>here</u> .	

2	Discuss causes and	Use this interactive website by the Climate Change Knowledge Portal of the		
	impacts of Climate	World Bank to have your students understand the impacts of Climate		
	Change in Niger	Change in Niger. This resource includes the following:		
		I. Climate Change Overview of Niger		
		II. Country Summary		
		III. Current Climatology: Climate Trends and Variability in		
		Temperatures and Precipitation IV. Climate Projections		
		IV. Climate Projections V. Vulnerability of Niger to Climate Change		
		v. vulnerability of reiger to Chillate Change		
		Each section contains relevant climate change information including data,		
		projections, and visualizations. The data is visualized through interactive		
		graphs and users can select different indices, model projections,		
		timescales, and sectors to better understand the impacts of climate change		
		in Niger.		
		This can be accessed <u>here</u> .		
3	Further understanding	You may wish to have your students explore climate change and its risks in West Africa Sahel in more detail through a resource from climatelinks: A		
	on impacts of Climate	Global Knowledge Portal for Climate and Development Practitioners of the		
	Change on key sectors in Niger	USAID.		
		This factsheet on climate risks in West Africa Sahel includes information on: I. Current and future climate impacts and vulnerabilities in West Africa Sahel. II. Climate impacts on key sectors of:		
		1) Agriculture		
		2) Livestock 3) Water Resources		
		4) Human Health		
		5) Ecosystems		
		6) Fisheries		
		This can be accessed <u>here</u> .		
		You may wish to conduct a {roleplay} activity in your classroom/laboratory		
4	OPTIONAL	to further engage your students in understanding the climate crisis in		
Classicolli, Laboratory		Niger; specifically on the impact of climate change on food security and		
	Chad Crisis'	water security in Niger.		

Learning Outcomes:

The tools in this lesson plan will enable students to:

- learn about climate change and global warming
- understand the impacts of climate change in Niger
- discuss how changing weather patterns due to climate change could affect future of Niger
- describe the current and future health risks and economic impacts on Niger due to climate change

Additional Resources

1	Reading	West Africa Greenhouse Gas Emissions Fact Sheet: This fact sheet for West Africa by Climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the USAID, provides information on greenhouse gas emissions (GHG) by sector, changes in emissions, information on carbon intensity, as well as climate change mitigation targets and plans.	
2	Reading	Climate Risks in Food for Peace Geographies- Niger: This fact sheet by Climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the USAID, gives information about impacts of Climate Change on food security in Niger.	
3	Reading	Climate Vulnerabilities and Development in Burkina Faso and Niger: This technical report by Climatelinks: A Global Knowledge Portal for Climate and Development Practitioners of the USAID, outlines the economic, social, and ecological information in Niger and Niger, and through this lens assesses valued assets and services which are at risk, existing efforts and remaining gaps, and recommendations to increase climate resilience.	
4	Reading	Intended Nationally Determined Contribution, Niger: This report provided by UNFCCC is a submission of commitment towards mitigating Climate Change by Niger.
