

Lesson Plan: Climate Change Impacts in Portugal

As a **High School** or introductory **Undergraduate** teacher, you can use this lesson plan to **introduce climate change and its impacts in Portugal**.

This lesson plan provides an introduction to climate change, causes and impacts of climate change globally, climate change risk profile for Portugal that includes climate impacts on major sectors of the country such as agriculture, water resources, human health and industries.

Thus, the use of this lesson plan allows you to teach Climate Science and Climate Change in your classrooms.

Use this Lesson Plan to help the students to understand and find answers to:

1. What is Climate Change? What are its causes?
2. What are the impacts of climate change on Portugal?
3. What are the impacts of climate change on agriculture, water resources, human health, and industries in Portugal?
4. What mitigation practices can be adopted to control the impacts of climate change in Portugal?

About the Lesson Plan

Grade Level	High School, Undergraduate
Climate Topic	Climate Change Impacts in Your Country
Location	Europe, Portugal
Access	Online
Language(s)	English
Approximate Time Required	60 mins

Contents

1.	Reading (15 min) and Video (5-15 min)	A reading from the NASA Global Climate Change website that includes information about what is the scientific evidence for climate change, causes, and impacts of climate change. This can be accessed here . Optional: A set of 7 short video micro-lectures (2-5 minutes in length) on climate change and global warming developed by the National Research Council, The National Academies of Sciences, Engineering, and Medicine. This can be accessed here
2	Reading 1 (World Bank)	A reading by the Climate Change Knowledge Portal of the World Bank that explains climate change and impacts in Portugal. This can be accessed here .
5	Classroom/Laboratory Activity (15 min)	A classroom/laboratory activity based on a reading and video in Portugal. This reading and video explains the causes and impacts of Portugal on Portugal and also states the possible solutions to counter the crisis. The reading can be accessed here . The video can be accessed here .

Step-by-step User Guide

(Here is a step-by-step guide to using this lesson plan in the classroom/laboratory. We have suggested these steps as a possible plan of action. You may customize the lesson plan according to your preferences and requirements.)

1	Introduce Climate Change through the readings and videos	<p>This reading titled, “The Causes of Climate Change” from the NASA Global Climate Change website, provides introductory information on climate change and global warming. It contains information on the scientific evidence of climate change, its causes and impacts.</p> <p>This can be accessed here.</p> <p>Optional: This set of 7 short video micro-lectures (2-5 minutes in length) have been developed by the National Research Council, The National Academies of Sciences, Engineering, and Medicine. This can be used to provide additional information on climate change.</p> <p>They include:</p> <ol style="list-style-type: none">1. What is Climate? Climate Change, Lines of Evidence Chapter 12. Is Earth Warming? Climate Change, Lines of Evidence Chapter 23. Greenhouse Gasses. Climate Change, Lines of Evidence Chapter 34. Increased Emissions. Climate Change, Lines of Evidence Chapter 45. How Much Warming? Climate Change, Lines of Evidence Chapter 56. Solar Influence. Climate Change, Lines of Evidence Chapter 67. Natural Cycles. Climate Change, Lines of Evidence Chapter 7 <p>This video playlist can be accessed here.</p>
2	Discuss causes and impacts of Climate Change in Portugal	<p>Use this interactive website by the Climate Change Knowledge Portal of the World Bank to have your students understand the impacts of Climate Change in Portugal. This resource includes the following:</p> <ol style="list-style-type: none">I. Climate Change Overview of PortugalII. Country SummaryIII. Current Climatology: Climate Trends and Variability in Temperatures and PrecipitationIV. Climate ProjectionsV. Vulnerability of Portugal to Climate Change <p>Each section contains relevant climate change information including data, projections, and visualizations. The data is visualized through interactive graphs and users can select different indices, model projections, timescales, and sectors to better understand the impacts of climate change in Portugal.</p> <p>This can be accessed here.</p>
4	OPTIONAL Classroom/Laboratory Activity on the ‘Lake Chad Crisis’	<p>You may wish to conduct a {roleplay} activity in your classroom/laboratory to further engage your students in understanding the climate crisis in Portugal; specifically on the impact of climate change on food security and water security in Portugal.</p>

Learning Outcomes:

The tools in this lesson plan will enable students to:

- learn about climate change and global warming
- understand the impacts of climate change in Portugal
- discuss how changing weather patterns due to climate change could affect Netherland's future
- describe the current and future health risks and economic impacts on Portugal due to climate change
