

TROP ICSU HIGHLIGHTS 2020

Here are the highlights of the TROP ICSU: Climate Change Education project.

The year 2020 has highlighted the fact that global challenges need global cooperation. The urgency of addressing the climate change issue is felt even more during this period. Let us welcome the year 2021 by joining hands and standing together for better global cooperation.

We thank all the teachers who are contributing teaching resources to the collection and are using them to teach about climate change in their classrooms in innovative ways.
